PREMIUM
HOSTING

lightcommerce

Petit Press

IRISOFT

Case: Rytmus fenomen

Problem	Solution with evia
no system administrator in the team	evia replaces the role of system administrator
high traffic peaks for short intervals	auto-scaling covers the peaks
low average traffic	cost reduction by pay-as-you-go pricing

Case: biznisweb.sk/byznysweb.cz

Problem

team of web developers
with insufficient expertise
in server administration

constant increase for
the need of HW resources

regular downtime
with the previous provider

Solution with evia

evia replaces the role of
system administrator

horizontal / vertical scaling
across one or more servers

high availability

Case: Petit Press (nanicmama.sme.sk)

Problem	Solution with evia
high cost of dedicated servers	30% cut in the monthly costs
lack of internal capacity for managing subpages.sme.sk	evia replaces the role of system administrator
slow pages during peak-time	more than 10x faster page load
